

1. Identification

Product identifier

Material Name: VAXXON® EDS, Emulsified inactivated vaccine against Egg Drop Syndrome (EDS'76)

Trade Names: VAXXON® EDS

Chemical Family: Mixture

Recommended Use: Vaccine, used to provide active immunization of chickens against Egg Drop Syndrome (EDS'76). For veterinary use only.

Manufacturer Details:

IZO S.r.l. a socio unico
S.S. 234 per Cremona Km 28.2
27013 Chignolo Po (PV) – ITALY

Manufacturer Company Details:

IZO S.r.l. a socio unico
Via San Zeno, 99/A
25124 Brescia - ITALY

Supplier:

Vaxxinoa US, Inc.
360 NW 45th ST
Willmar, MN 56201
www.vaxxinoa.us.com

Customer Care Telephone Number: (800) 220-2522

In case of an emergency, dial 911

2. Hazard(s) identification

Appearance: Milky oil emulsion

Classification of the Substance of Mixture

EU Classification: Not classified

Other Hazards

Short Term: In the event of an accidental injection, an allergic reaction may occur. If an allergic reaction occurs, the worker should be removed to the nearest emergency room and the appropriate therapy instituted. This product is an oil-adjuvanted suspension. May be harmful if swallowed. May cause eye and skin irritation.

3. Composition/information on ingredients

	Name of Substance	Quantity/Dose	CAS Number
Active Ingredient	Live attenuated Swollen Head Syndrome virus strain 1439	Varies	Not assigned
Excipient	Oil vehicle (Sorbitaine oleate, Polysorbate 80, Light liquid paraffin)	q.s. to one dose	Mixture

	Thiomersal		54-64-8
	PBS solution		Mixutre

4. First-aid measures

Description of First Aid Measures

Eye Contact: Flush with water while holding eyelids open for at least 15 minutes. Seek medical attention immediately.

Skin Contact: Remove contaminated clothing. Flush area with large amounts of water. Use soap. Seek medical attention.

Ingestion: Never give anything by mouth to an unconscious person. Wash out mouth with water. Do not induce vomiting unless directed by medical personnel. Seek medical attention immediately.

Inhalation: Remove to fresh air and keep patient at rest. Seek medical attention immediately.

Accidental self-injection: If injected the vaccine can cause serious localized reactions in vaccinator for which expert medical advice should be sought at once, informing the doctor that the vaccine is an oil emulsion.

Symptoms and Effects of Exposure: For information see Section 2 – Hazard Identification and/or Section 11 – Toxicological Information.

5. Fire-fighting measures

Type of Hazard: Not classified as flammable.

6. Accidental release measures

Personal Precautions, Protective Equipment and Emergency Procedures

Personnel involved in clean-up should wear appropriate protective equipment to minimize exposure.

Procedure for Disposal: The bottle must be dipped in an antiseptic solution. Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal product should be disposed of in accordance with local requirements.

7. Handling and storage

Precautions for Safe Handling

Avoid contact with skin, eyes and mucosa. Keep containers adequately sealed during material transfer, transport, or when not in use. See Section 8 – Exposure Controls for additional guidance. Do not eat, drink or smoke while using the product. The product should be handled according to the rules applicable to immunological veterinary products.

Conditions for Safe Storage: Store in original container. Keep out of reach of children.

Store Site Requirements: Store between 2 and 8°C. Do not freeze.

Packaging: Polypropylene bottle of 500 mL stoppered and sealed containing the vaccine in the form of oil emulsion, equal to 1000 doses.

8. Exposure controls/personal protection

Personal Protection: Refer to applicable national standards and regulations in the selection and use of personal protective equipment. Use protective clothing.

9. Physical and chemical properties

Color: white and milky

Appearance: Homogenous oil emulsion

10. Stability and reactivity

Stability of the Substance: Stable under recommended storage conditions.

Conditions to Avoid: Avoid high temperatures and freezing.

11. Toxicological information

Acute Effects: Local injection site reaction in humans may occur from accidental injections through the skin (needle stick injury). Hypersensitivity reactions can occur in individuals sensitive to active substance or to any of the excipients.

12. Ecological information

In the majority of cases, the nature of Immunological Veterinary Medicinal Products is such that they will have a very low environmental risk potential. (Ref. EMEA/CVMP/074/95-FINAL "Guideline on Environmental Risk Assessment for Immunological Veterinary Medicinal Products").

13. Disposal considerations

Disposal must be in accordance with applicable federal, state/provincial, and/or local regulations.

14. Transport information

Transport must take place under conditions of controlled temperatures (2-8°C)

15. Regulatory information

TSCA Status: This product is a food, food additive, drug, cosmetic, or medical or veterinary device or product as defined by section 201 of the Federal Food, Drug and Cosmetic Act and therefore is exempt from TSCA regulation.

16. Other information

Not applicable.
